

WORK WITH EVERCHARGE

Fully-managed, affordable, scalable charging solution

Bringing new business to you through fully-scalable power management technology

EverCharge is the **right solution** for multi-tenant buildings. We offer the only **fully-managed**, scalable solution for EV charging and make things easy by providing insurance, maintenance, support and billing services for every customer.

What makes EverCharge different?

Tesla Preferred

Tesla Motors preferred EV charging solution

Power Management

Less infrastructure and more customers

Monitoring

No need for meters or submeters

Exclusivity

EV owners can charge in their own parking space

Scalability

Add vehicle capacity as demand grows

Support

We manage HOA and tenants so you can focus on your work

How We Work With You

- 1) Properties are introduced to EverCharge
- 2) EverCharge's preferred electrician (you) conducts on-site evaluation
- 3) Electrician creates customer installation quote
- 4) EverCharge works with HOA and customer to get approval
- 5) Installation is completed by electrician

CHARGING EVOLVED

Why have one customer when you can have many?

Power Management

Our solution intelligently manages power based on vehicle demand. When EverCharge senses extra power is available or the rated capacity is reached, the system allocates power to vehicles according to their needs, providing residents with the fastest charging possible.

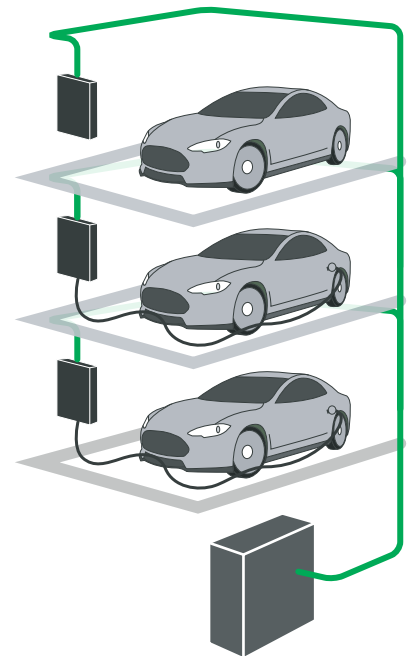

How it Works

Our chargers connect to common area power to easily scale throughout the building. Usage is then monitored by the charger to keep track of the allocated power. All billing is automated so there is no need for separate services.

Team Building

We don't just want a partnership - we want to be a team with all of our preferred electricians. That's why we offer extensive insight and training, as well as full-time dedicated support.

Our goal is to bring you as many new customers as possible, **because when you win, we do to.**
